

IT'S 1981  
ALL OVER  
AGAIN.

THE COMPUTER  
IS PERSONAL  
AGAIN.

It's the one case where technology hasn't been able to outdo itself. The HP 12c. Introduced 25 years ago, it has stayed almost exactly the same. It's still issued to analysts at top investment houses around the world. Fortune 500® CFOs still carry it into every business meeting. And now it has a processor that's up to six times faster, and both RPN and algebraic functionality. The 25th Anniversary Edition 12c Platinum. 25 years later and it'll still crunch your bottom line. That's a reason to celebrate.

Available at Best Buy™, Circuit City®, Office Depot® or visit [hp.com/calculators](http://hp.com/calculators).
