

HP Mobile Print Driver for Windows®

Version 2.0

Get fast, easy printing to local and network printers and simplify IT print driver management with a common driver for basic printing in your business environment.

Easy to use

- **Simplify mobile and business printing.** The driver is easy to set up and use, enabling effortless mobile printing from a conference room, a satellite office, or remotely from a home office. In addition, IT administrators can deploy the driver for basic printing and reduce the complexity of managing multiple print drivers.
- **Get easy access to advanced printer options.** Enjoy enhanced features such as print task quick sets for frequently-printed jobs, n-up printing to increase the number of pages printed per sheet, booklet printing, and watermark printing.
- **Download the driver for free.** Go to www.hp.com/go/mpd4w to obtain the free driver.

Manageable

- **Reduce support costs for IT administrators.** The driver features simple, one-click installation as well as advanced installation options, such as support for the Add Printer Wizard feature via an .INF file.
- **Take advantage of improved discovery capabilities.** Access networked printers via an IP address, UNC, or network path for fast, simple mobile printing. Using HP Web Jetadmin, administrators can quickly and easily display IP addresses on all HP printers or MFPs with a front panel display.
- **Enable speedy printing.** Users can create custom profiles such as home, work, or travel, to quickly access the printer of their choice. The Profile feature also captures the most recently used printers in a drop-down list.

- **Create printer lists for quick access.** With HP Managed Printer Lists, administrators can define and manage lists of printers for easy device discovery by mobile users. The lists can be accessed centrally or distributed to clients using the driver.
- **Control printer access.** With the Restricted Mode, administrators can configure the driver to display only those devices that are defined in an HP Managed Printer List. This allows tight control of the devices that can be accessed by mobile users.

Compatible

- **Access the driver from any application.** Select Print from the File menu of any Windows application to use the driver, making mobile and business printing flexible and familiar.¹
- **Depend on industry-standard HP driver technology.** Backed by HP consistency and reliability, the enhanced user interface is similar to HP LaserJet premium print drivers, making mobile printing easier than ever.
- **Enjoy one driver for directly connected and networked printers.** Get convenient, high-quality customized printing to local and networked printers via wired connections, as well as Bluetooth™, network print share, and 802.11 wireless connections. There's no need to configure a specific print driver or network print path to print directly to network printers.

¹ HP Mobile Print Driver for Windows supports Microsoft® Windows 2000 and XP; for Windows 98, ME, and NT 4.0 support, use the HP Mobile Printing for Notebooks driver.

HP Mobile Print Driver for Windows 2.0 makes printing on the go fast and easy.

Simple network printing for mobile workers

Portable PCs provide the freedom to work virtually anywhere and make collaboration easier and more productive. As wireless capabilities becoming increasingly common, the mobile experience rises to a new level at which work is no longer a place, but an activity that can be engaged in at any time from any location.

HP innovation is making portable PC and wireless technologies more effective by improving access to printing resources and reducing IT support and management costs.

HP recognized that the proliferation of portable PCs meant more and more people would be working in multiple locations. To make the most of the mobile work experience, users would have to be able to access network printing resources. The biggest obstacle to accessing printing resources has been print driver support. Even though portable PCs provide unprecedented location flexibility, they are typically configured with driver support for a limited number of printers. HP developed a solution: HP Mobile Print Driver for Windows.

Flexible and easy to use

Install the driver on any Windows PC with one click to enable users to print to any HP printing device with HP PCL 5 or HP postscript emulation. Faster and far less complicated than finding multiple specific print drivers, HP Mobile Print Driver for Windows is always accessible from Windows applications.

Designed with the future in mind, the driver provides access to most of the advanced printing features found in the next generation of HP business printers. The driver is bundled with select HP and Compaq notebook and tablet PCs and is also available as a free download from the HP Web site at www.hp.com/go/mpd4w.

Basic corporate printing

In many cases, corporate users print only basic office documents and rarely change printer settings. The HP Mobile Print Driver for Windows is ideal for these users: with only a few clicks they can easily print to any HP printing device with HP PCL 5 or HP postscript emulation.

Using HP's Managed Printer List option, printer managers can configure and designate printers for simple access by mobile and corporate users via the driver.
