

HP Client Suites

Whether your organization is just beginning to address its client management needs or is well on its way to implementing client management best practices, managing your IT assets is crucial to the success of your business.

With the HP Client Suites, HP has grouped together our most essential client management solutions. These two suites simplify the selection of software solutions you need to monitor and control your client computer assets based on your business requirements, regardless of your size or structure.

HP Client Premium Suite

The HP Client Premium Suite (HP CPS) is designed for organizations wanting to address the entire client hardware and software management lifecycle. It combines:

- **HP Client Manager** — A free solution that enables centralized hardware management of HP and Compaq client computers from a Web browser
- **Altiris Audit Express** — Assess system vulnerability and get detailed reports using Crystal Report engine, with or without installing an agent on the client computer. Report details include:
 - antivirus software status
 - operating system security patches
 - industry-known top vulnerabilities
 - personal firewall status
 - basic system security configuration settings
 - unauthorized software
 - unauthorized hardware

- **Altiris Client Management Suite Level 1** — Includes Altiris Inventory, Deployment, Software Delivery, Patch Management, Application Metering, Application Management, and Carbon Copy Solutions
 - Altiris Inventory Solution — Provides a comprehensive hardware and software inventory of all clients (both HP and non-HP) attached to your network
 - Altiris Deployment Solution — Enables hands-off mass deployment of operating system and applications to desktops, notebooks, and handheld computers
 - Altiris Software Delivery Solution — Provides secure, bandwidth-sensitive distribution of applications and updates throughout your organization.
 - Altiris Patch Management Solution — Performs customized collection, analysis, and delivery of patches
 - Altiris Application Metering Solution — Determines which software applications and licenses are actually being used enabling you to better manage license purchase and allocation
 - Altiris Application Management Solution — Ensures applications remain in compliance with corporate standards
 - Altiris Carbon Copy Solution — Provides Web-hosted remote control with automated configuration and reporting

- **HP Systems Insight Manager Connector** — Provides integration with HP Client Manager for complete client hardware and software lifecycle management from within the SIM environment
- **Altiris Local Recovery Pro** — Takes data and machine state snapshots and stores them locally in a protected hard drive partition or on an external hard drive
- **HP OpenView Connector** — Provides inventory, event forwarding, and menu integration with HP OpenView
- **Altiris Connector Solution** — Integrates Altiris solutions with your organization's third-party systems

HP Client Premium Suite includes a QuickStart page and many predefined reports to provide a fast-track to full client hardware and software lifecycle management.

HP Client Foundation Suite

If your organization requires a less extensive set of features, HP Client Foundation Suite (HP CFS) is designed for organizations wanting to address essential client management functionality at an entry-level price. It combines HP Client Manager, HP Systems Insight Manager (SIM) Connector, Altiris Local Recovery Pro, and the Altiris Migration Suite, which includes the Altiris Inventory Solution and the Altiris Deployment Solution.

HP Client Foundation Suite includes a QuickStart page and many predefined reports to provide essential out-of-the-box client management functionality with quick time-to-value.

The following table summarizes the solutions included in the HP Client Suites.
