

HP Performance Advisor

MEET YOUR OWN PERSONAL WORKSTATION GURU

Windows.[®] Life without Walls.
HP recommends Windows 7.

Ever wish you had an HP technical expert on hand to professionally set up your new HP Workstation? Now you've got the next best thing.

Every time you turn on your new HP Workstation, you will find the HP Performance Advisor waiting for you. This ultra-savvy software wizard will help you get the most out of your HP Workstation from day one—and every day after.

Always easy

Designed by HP computer techies for non-techies to use and understand, the HP Performance Advisor is the simplest and most effective way to make sure your computer is always operating at its optimum potential.

Always helpful

Just launch this program anytime you want to check in on the health of your system. With just a few clicks of the mouse, you can determine what's working great, what's not and the information you need to improve your system's stability and performance.

Always ready

With each new application, driver, font and widget you install, your working environment changes. The HP Performance Advisor allows you to re-allocate resources, monitor memory usage and eliminate conflicts. This helps you stay on top of changes to your environment, helping you keep your system running fast and smooth.

Always compiling answers

If you need to troubleshoot a hardware or system issue, you'll find system information pulled into one convenient screen. You can even email the information directly to HP Technical Support for more effective analysis and repair.

Always—and only—HP

You won't find a solution this powerful on any other PC. Only on new HP Workstations.

Always start here

From the moment you first switch on the power to your new HP Workstation, the HP Performance Advisor is ready to help you get every penny's worth out of it. Consider it your own personal assistant, always reliable and always at your service.

What's it all mean?

HP Performance Advisor lets you spend more time working, processing, and designing and less time troubleshooting your IT. Below are the basic features and their respective benefits that help you maximize your hardware, applications, and productivity.

What HP Performance Advisor does

- Employs a simple Windows-based interface
- Selects and installs graphics drivers
- Assists in optimizing memory resources
- Tells you how your applications and processes are using physical and virtual memory and shows you color-coded results
- Monitors CPU and memory for potential performance impact on applications and workstation
- Uses HP HyperTune technology to configure maximum performance requirements for specific applications
- Provides a consolidated hardware and application report
- Updates dynamically and automatically checks and downloads framework updates and database components

What it means to you

- Immediate productivity and configuration tuning
- Increased performance/stability
- Guidance in selecting the best possible drivers for each application
- Achieve maximum productivity
- Low maintenance
- You're always working with the latest version
- Optimized solutions
- Tools for benchmarks, diagnostics, and logging
- Handy for future reference and support calls
- Quick, easy views of configurations and online technical specifications for each system
- Formal Windows assessments and Windows Experience Index details are exposed

Specified by operating system and target application per workstation.

Graphics

Visit the product page on www.hp.com for a full list of supported NVIDIA and ATI graphics cards

Disk space

10 MB for installation

Networking

Standard TCP/IP

Sound familiar?

The HP Performance Advisor is a renamed, revamped and completely overhauled version of the former HP Performance Tuning Framework software. Not only does it work smarter and simpler, it's all-around sleeker, with the same user-friendly look of HP SkyRoom and HP Support Assistant. You'll feel right at home.

Order your HP Workstation today, and get the HP Performance Advisor working for you.
